- [Rockwell](#)

Born: September 27, 1939

Location: Cecila, LA

J. Harvey LeBlanc
Executive Design Director (Retired)
Propulsion and Mechanical Systems
Boeing Co.

Harvy was the design engineer for Space Shuttle Main Propulsion and I supported its testing and launch at KSC We spoke daily for nineteen years at work and have been close since our retirements. He was the brains. We were the brawn.

It's with a very heavy heart that I announce that my father "The Rocketman" left us today to fly his final mission to the man upstairs.

He passed very peacefully and we know he is in the best place ever. To all of his friends and family who have been praying for him we can't thank you enough. To all of his space buddies, wether you ever met him in person or just chatted on line, thank you so much. All of the stories and sharing of knowledge meant the world to him. He loved his space career.

He will be greatly missed but never forgotten because he touched so many people and spread so much knowledge.

Jason LeBlanc
